We offer a range of pool finishes and specialty renders designed for different types of swimming pools. We can provide specialized materials such as plaster mixes, aggregate blends, pebble finishes, and other coatings tailored for pool interiors. We can offer customization options, allowing clients to choose from a variety of colors, textures, and finishes to suit their preferences.

We use the world wide top products like

Thermoplastic coating

Eco finish

Polycoat

Cement based products

Cement plastering

Pebble fina

Pebble tec

Marbelite

Resin and pebble mix product for the pools and terraces

Resin and pebble

Mechanized plaster is the same process for plastering walls, but using special machines, allowing us to do all the work much faster and easier.

Mechanical plastering

Flexible waterproofing and protection of concrete structures

Pool hydroisolation
